

Contents of the Proceedings

Contents	B3
Preface	B7
<i>Ufimtsev A.G. et al.</i> : Vladimir L. Solovianov.....	B9

Spin Physics in Particle Interactions:

<i>Leader E.</i> : The internal spin structure of the nucleon: progress in our understanding	B11
<i>Ratcliffe Philip G.</i> : QCD evolution of transversity in leading and next-to-leading order.....	B27
<i>Teryaev O.V.</i> : Sources of time reversal odd spin asymmetries in QCD.....	B47
<i>Dorokhov A.E.</i> : Instanton effects at high energies	B59
<i>Efremov A.V., Goeke K., Schweitzer P.</i> : Collins analyzing power and azimuthal asymmetries	B69
<i>Arash Firooz, Atashbar-Tehrani Shanin, Khorramian Ali N.</i> : Spin structure of constituent quark and polarized structure of hadrons	B71
<i>Goloskokov S.V.</i> : Diffractive hadron lepton production and SPD	B77
<i>Di Salvo E.</i> : Transverse momentum, factorization and the HERMES experiment	B93
<i>Selyugin O.V., Kundrát V., Lokajíček M.</i> : High-energy spin effects and structure of elastic scattering amplitude.....	B101
<i>Kiryuk J. for the STAR Collaboration</i> : Spin physics with STAR.....	B109
<i>Kanavets V. for pp2pp Collaboration</i> : Experiment pp2pp at RHIC.....	B123
<i>Svirida D.N. for RHIC Spin Collaboration</i> : RHIC pC CNI polarimeter: Experimental setup and physics results	B133
<i>Svirida Dmitry for ITEP-PNPI Collaboration</i> : New results on spin rotation parameter A in the π p-elastic scattering in the resonance region.....	B139
<i>K. Lipka on behalf of the HERMES Collaboration</i> : Vector-meson production at intermediate energies.....	B149
<i>Heinsius F.-H. on behalf of the COMPASS Collaboration</i> : The COMPASS experiment at CERN.....	B159
<i>Moinester M. et al. for COMPASS Collaboration</i> : Pion and kaon polarizability at CERN COMPASS	B169
<i>Moinester M. et al.</i> : Color transparency at COMPASS via exclusive coherent vector meson production.....	B189
<i>Moinester M. on behalf the FNAL SELEX Collaboration (E781)</i> : First Observation of Doubly Charmed Baryons	B201

<i>Krimmer J.</i> : Experimental check of the GDH sum rule at MAMI and ELSA	B215
<i>Van de Wiele J. and Morlet M. and the A4 Collaboration</i> : Parity violation experiment at Mainz	B223
<i>Sharov V.I. et al.</i> : Dubna “DELTA-SIGMA” experiment. Preliminary results on energy dependence of $\Delta\sigma_L(\text{np})$ between 1.2–3.7 GeV for 2001 data taking run	B235
<i>Azhgirey L.S.</i> : Investigation of polarization observables in reactions with polarized deuterons at the JINR Synchrophasotron.	B243
<i>Ufimtsev A.G. n behalf of SPIN@U-70 Collaboration</i> : The planned SPIN@U- 70 experiment to study A_n in 70 GeV very-high P_t^2 proton-proton elastic scattering.	B249
<i>Valkárová A. representing H1 Collaboration</i> : Deeply virtual Compton scattering at H1 experiment	B257

Symmetry and Supersymmetry

<i>Gladyshev A.</i> : Introduction to Cosmology	B263
<i>Burinskii A., Hildebrandt S.R.</i> : Regular black holes and confinement	B283
<i>Rivas M.</i> : The dynamical equation of the spinning electron	B289
<i>Kolganova E.A. et al.</i> : The $^3\text{He}^4\text{He}_2$ trimer within the hard-core Faddeev approach	B301

Symmetry and Spin Physics in Nuclear Interactions and Nuclear Structure:

<i>Pignanelli M.</i> : From high-spin to isospin physics	B305
<i>Borge M.J.G., Prezado Y. and Tengblad O. (for the IS339, IS361 and ISOLDE Collaborations)</i> : Beta-delayed multi-particle emission in light nuclei	B315
<i>Ren Zhongzhou et al.</i> : Halos in exotic nuclei	B327
<i>Fransen C. et al.</i> : Isovector transitions in the ^{100}Sn mass region	B333
<i>Tengblad O. the ISOLDE and REX-ISOLDE Collaborations</i> : The ISOLDE and REX-ISOLDE facility	B343
<i>Inamura T.T., Karpeshin F.F., Trzhaskovskaya M.B. Dubna-Poznan-St. Petersburg- Warsaw Collaboration</i> : Bridging atomic and nuclear States in ^{229}Th	B349
<i>Barabanov A.L., Furman W.I.</i> : Test of fundamental symmetries as a tool for fission dynamics studies	B359
<i>Barabanov A.L., Beda A.G. and Volkov A.F.</i> : Present status of problem of TRI violation investigation with the use of aligned nuclei	B371
<i>Karamian S.A. and Adam J.</i> : Estimation of the spallation-residue angular momentum in p+Ta, Re reactions	B381
<i>Karpeshin F.F. and Bakulev V.M.</i> : Resonance response of the electron shells of Th ions put in aqueous solution	B395

Contents of the Proceedings

<i>Seliverstov M.D. et al.</i> : Charge radii and electromagnetic moments measurements of $^{153,155}\text{Yb}$ and $^{153,154}\text{Tm}$ by laser ion source photoionization spectroscopy technique	B401
--	------

New Technique and Methods of Treatment of Experimental Data

<i>Jinnouchi O.</i> : RHIC pC CNI polarimeter: status and performance from the first collider run	B409
<i>Yoshimi A., Asahi K., Yogo K.</i> : Nuclear spin maser with an artificial feedback for fundamental physics	B417
<i>Azhgirey L.S. et al.</i> : Calibration of the beam polarimeter at the JINR Synchrophasotron	B425
<i>Finger M., Ososkov G.A.</i> : Outlook of COMPASS RICH1 data handling algorithms	B429
<i>Belotelov I.I. and Ososkov G.A.</i> : How to constrain external degrees of freedom during internal alignment of contemporary detectors	B441
<i>Afanasev A.V. et al.</i> : ERLANGEN: Monte Carlo generator for radiative events in elastic-proton scattering	B449

Future Experimental Programms

<i>Antonov R.A. et al.</i> : Sphere Project	B455
<i>Saprykin O. and Tyukavin R. on behalf of the Space Regatta Consortium</i> : Large size optics in space, TUS experiment: large space concentrator for sciences detector	B465
<i>Borisov N.S. et al.</i> : Experimental research of the NN scattering with polarized particles at the neutron energies 14–16 MeV	B475
Program of School-workshop	B485
List of participants	B495
List of authors	B505
