“Bogolyubov Readings”

Dubna, September 22-25, 2010

*Richard Lednicky,
JINR Vice -Director*

Bogoliubov readings

In Russia the word “readings” traditionally bears also the meaning of the conferences devoted to some outstanding personality -

Nikolai Nikolaevich Bogoluybov – Prominent Theorist, Founder of this laboratory

Each 5 years – there are big conferences. Since now they will be completed by smaller annual workshops dedicated to one of the subjects of investigations in BLTP –

[Theory of Elementary Particles,](#)
[Nuclear Structure and Dynamics,](#)
[Theory of Condensed Matter and New Materials,](#)
[Modern Mathematical Physics: Gravity, Supersymmetry, Integrability](#)

This year – these are the selected issues in particle physics (extra dimensional gravity, lattice field theory, QCD challenges)

The initiative of these workshops belongs to the JINR Director Alexei Sissakian (1944-2010) who suddenly passed away on May 1st
